Q1-3 2023|24

AGRANA DELIVERED A SUBSTANTIAL EBIT

- Amid a **sustained volatile business environment, operating performance improved** in almost all our major businesses
- **Difficult business trend in Asia**, which gave rise to an **asset impairment** charge of about € 16 million at the end of the financial third quarter
- **Changes on the Management Board**, adjusted responsibilities
- **Outlook for the full year 2023|24**: we still expect the Group's EBIT to be very significantly higher than for the 2022|23 financial year
 - This positive guidance reflects the robust operating performance in the first three quarters of the financial year.
 - **From the fourth quarter of 2023|24 and in the subsequent months, we see an increasingly challenging business environment.**

 - 30% emission reduction (scope 3); approx. 34% incl. FLAG
 - Further ambition: net-zero emissions scope 1+2 by 2040, scope 3 by 2050 at the latest.
- Top 5 emission reduction projects by 2030

Segment	Site	Description	~t CO ₂ reduction	Energy saving (in MWh)	Investment (in € million)	Implementation
Sugar	Opava	Switching from hard coal to natural gas (or, in the longer term, potentially biogas)	25,400	25,470	4.7	2025
Starch	Gmünd	Biomass Boilers Part 1	23,000	114,000	25	2028

- Investments for scope 1+2 by 2030: € 203 million for the AGRANA Group (of which € 93,5 million in AT); by 2040, based on project modelling, AGRANA Group would have to invest at least € 506 million (of which € 202 million in AT) in order to achieve the target.
- Concrete scope 3 measures under development, based on AGRANA's specific emission factors for processed raw materials
 - Hotspots Scope 3: ensuring deforestation free supply chains for imported raw materials & traded goods, use of lower-emission fertilizers, support of the implementation of regenerative agricultural practices (i.e. CO₂ sequestration and biodiversity promotion)

Emissions (Scope 1+2) of the AGRANA Group

Bar chart: total amounts (gross), in thousand tonnes of CO₂

23,000 t additional consumption of HEL for potential natural gas substitution and securing energy supply in AT. Natural gas substitution and securing energy supply in AT compensated by lower raw material processing volumes

Q1-3 2023|24

MARKET ENVIRONMENT - HIGHLIGHTS

Fruit segment

- Fruit preparations: business is back on track since the beginning of the financial year; stress factor here is the continuing **difficult business trend in Asia**
- Fruit juice concentrate: situation in the fruit juice concentrate business remains very satisfactory; improved contribution margins of apple juice concentrates made from the 2022 crop

AGRANA BIOETHANOL ACTIVITIES

PISCHELSDORF (Austria)

- Total investment: € 125 million
- Capacity: up to 240,000 m³ (= 190,000 tonnes)
- Production start: June 2008
- Raw material base: wheat, corn and sugar beet thick juice*
- Raw material base: wheat, corn, B+C starch slurry

HUNGRANA (Hungary)

- Investment volume: ~ € 100 m (50% share held by AGRANA: ~ € 50 m)
 - for grind increase from 1,500 to 3,000 tonnes/day
 - for isoglucose capacity increase due to quota increase
 - for bioethanol expansion
- Capacity: up to 187,000 m³
- Conclusion of expansion programme: July 2008
- Raw material base: corn

STARCH SEGMENT

E10

- **AVAILABLE IN AUSTRIA SINCE THE END OF MARCH 2023**
- AGRANA has been producing enough bioethanol for a 10% blend (E10) in Austria since 2008
- Before E10 introduction, 40% of production used for E5 blending; 60% exported, resulting in a loss of nearly 200,000 t GHG savings for Austria

Austria 16th EU country with E10

BIO-ETHANOL REDUCES PROTEIN GAP

- Bioethanol is produced exclusively from the starch content of feed grains; the valuable protein content remains in "concentrated" form in the feed cycle and replaces soy imports
- thus the market demand for conc. protein due to dietary habits is eliminated
- approx. 200,000 tons of non-GMO protein feed ActiProt® significantly reduces EU protein feed imports

Q1-3 2023|24

MARKET ENVIRONMENT - HIGHLIGHTS

Starch segment

- Overall margin for starch products was successfully held stable thus far, despite the economy-driven challenges
- However, due to the **significant fall in Platts prices**, the performance in the ethanol operations was much weaker than in the same period of the year before, when ethanol earnings were above average

BENEFIT FROM THE STRONG MARKET POSITION IN CEE AND SEE

AGRANA SUGAR SINCE THE END OF QUOTAS

- CEE area will continue to be a "sugar deficit region" (AGRANA is located in these main deficit areas)

 - Defend and extend existing market share in CEE
 - AGRANA has established **long-term relationships** with key sugar producers in the LDCs and ACPs (duty-free-imports)
 - Uncertain market development requires **continuous flexibility**

Q1-3 2023|24 VS PRIOR YEAR

REVENUE BY SEGMENT

€m

FRUIT

- Fruit preparations revenue rose for price reasons
- In the fruit juice concentrate activities, revenue remained stable, with lower delivery volumes offset by higher selling prices

STARCH

- Sales were moderately lower than in the same period of the previous year, in which the war in Ukraine led to massive price increases on the markets
- Selling prices for ethanol fell significantly, owing to a steep year-on-year drop of about 27% in Platts quotations

SUGAR

- Growth, achieved despite lower sales volumes, was driven by a substantial rise in sugar selling prices

Q1-3 2023|24 VS PRIOR YEAR

EBIT BY SEGMENT

FRUIT

- As of 30 November 2023, within EBIT, a non-cash impairment loss of about € 16 million was recognised on assets in Asia
- In the prior-year comparative period, following an impairment test at 31 August 2022, impairment on assets and goodwill was recognised in exceptional items as part of EBIT, due primarily to increased cost of capital
- Operating performance yoy was better in the fruit preparations business as well as in the fruit juice concentrate business

STARCH

- A key reason was that AGRANA's share of the earnings result of the equity-accounted HUNGRANA group deteriorated very significantly
- It was primarily in the first half of 2023|24 that the low margins of the ethanol due to significantly lower Platts prices weighed on the Starch segment's operating profitability

SUGAR

- Improvement due to significantly increased margins despite a marked rise in beet prices

FINANCIAL OUTLOOK

AGRANA GROUP

OUTLOOK FOR 2023|24

EBIT 2023 | 24

Revenue 2023 | 24

- The positive EBIT guidance reflects the robust operating performance in the first three quarters of the financial year. **From the fourth quarter of 2023 | 24 and in the subsequent months, AGRANA sees an increasingly challenging business environment.**

Forecast uncertainty and assumptions

The war in Ukraine, which has been underway since the beginning of the 2022|23 financial year, broadly led to an increase in the already high volatility in the sales markets and fueled price hikes in procurement markets, notably for raw materials and energy. In addition, the fact that agricultural imports from Ukraine are granted duty-free access could cause further market disruption in the EU. For the full 2023|24 financial year and also for 2024|25, despite the current reduction in volatility it remains difficult to assess the economic and financial impact, the security of supply and the duration of this temporary exceptional situation.
